

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method of presenting and managing a history of web pages accessed, comprising:

accessing a web page by a user;
reducing the size of the accessed web page to a thumbnail snapshot;
comparing the accessed web page content to a previously accessed web page content; and
displaying the thumbnail snapshot of the accessed web page to the user in an area of a screen containing only history information if the accessed web page content and the previously accessed web page content are not the same.

2. (Previously presented) The method recited in claim 1, wherein prior to the reducing the size of the accessed web page to a thumbnail snapshot, further comprising:

checking a history file to determine if the accessed web page is in the history file; and
reducing the size of the web page only when the accessed web page is not in the history file.

3. (Original) The method recited in claim 2, wherein the thumbnail snapshot is displayed to the user in a toolbar.

4. (Original) The method recited in claim 3, wherein the toolbar is able to scroll and display a plurality of thumbnail snapshots from the most recent to the least recent.

5. (Previously presented) The method recited in claim 1, further comprising:

displaying one or more thumbnail snapshots of bookmarked web pages in a second area of the screen.

6. (Currently amended) A computer program embodied on a computer readable medium and executable by a computer for presenting and managing a history of web pages accessed, when executed performing the steps of:

accessing a web page by a user;
reducing the size of the accessed web page to a thumbnail snapshot;
comparing the accessed web page content to a previously accessed web page content; and
displaying the thumbnail snapshot of the accessed web page to the user in an area of a screen containing only history information if the accessed web page content and the previously accessed web page content are not the same.

7. (Previously presented) The computer program recited in claim 6, wherein prior to the reducing the size of the accessed web page to a thumbnail snapshot, further comprising:

checking a history file to determine if the accessed web page is in the history file; and
reducing the size of the accessed web page only when the web page is not in the history file.

8. (Original) The computer program recited in claim 7, wherein the thumbnail snapshot is displayed to the user in a toolbar.

9. (Original) The computer program recited in claim 8, wherein the toolbar is able to scroll and display a plurality of thumbnail snapshots from the most recent to the least recent.

10. (Previously presented) The computer program recited in claim 6, further comprising:

displaying one or more thumbnail snapshots of bookmarked web pages in a second area of the screen.

11. (Previously presented) The method of claim 1, wherein the area of a screen containing only history information displays a plurality of thumbnail snapshots of previously accessed web pages simultaneously.

12. (Currently amended) The method recited in claim 1, wherein the screen is embodied in a cellular phone or a ~~personal digital assistant~~ personal digital assistant.

13. (Currently amended) The method recited in claim 5, wherein the screen is embodied in a cellular phone the thumbnail snapshots of the bookmarked web pages ~~are being~~ arranged in a polar spatial organizational scheme.

14. (Currently amended) The computer program recited in claim 6, wherein the screen is embodied in a cellular phone or a ~~personal digital assistant~~ personal digital assistant.

15. (Currently amended) The computer program recited in claim 10, wherein ~~the~~ the thumbnail snapshots of the bookmarked web pages are arranged in a polar spatial organizational scheme.

16. (Currently amended) A terminal, comprising:

a processor;

a screen; and

a computer program embodied on a computer readable medium and executable by the processor for presenting and managing a history of web pages accessed, when executed performing the steps of:

accessing a web page by a user;

reducing the size of the accessed web page to a thumbnail snapshot;

comparing the accessed web page content to a previously accessed web page content; and

displaying the thumbnail snapshot of the accessed web page to the user in an area of the screen containing only history information if the accessed web page content and the previously accessed web page content are not the same.

17. (Currently amended) The ~~terminal recited~~ terminal recited in claim 16, wherein, when executed, the computer program, prior to the reducing the size of the accessed web page to a thumbnail snapshot, further performs the steps of:

checking a history file to determine if the accessed web page is in the history file; and
reducing the size of the accessed web page only when the web page is not in the history
file.

18. (Currently amended) The ~~terminal-recited~~terminal recited in claim 16, wherein the thumbnail
snapshot is displayed to the user in a toolbar.

19. (Currently amended) The ~~terminal-recited~~terminal recited in claim 18, wherein the toolbar is
able to scroll and display a plurality of thumbnail snapshots from the most recent to the least
recent.

20. (Currently amended) The ~~terminal-recited~~terminal recited in claim 16, wherein, when
executed, the computer program further performs the step of:

displaying one or more thumbnail snapshots of bookmarked web pages in a second area
of the screen.

21. (Currently amended) The ~~terminal-recited~~terminal recited in claim 16, wherein the area of a
screen containing only history information displays a plurality of thumbnail snapshots of
previously accessed web pages simultaneously.

22. (Currently amended) The ~~terminal-recited~~terminal recited in claim 16, wherein the
~~terminal-is~~terminal is a cellular phone or a ~~personal-digital-assistant~~personal digital assistant.

23. (Currently amended) The ~~terminal-recited~~terminal recited in claim 20, wherein ~~the~~the
thumbnail snapshots of the bookmarked web pages are arranged in a polar spatial organizational
scheme.
